Lindsey Claire Grubbs

Nine days after her 1st birthday Lindsey Claire Grubbs was diagnosed with stage IV Hepatoblastoma, a very rare form of pediatric liver cancer. Her tumor was roughly the size of a softball and she had 5 lung metastasis.

Lindsey underwent 18 weeks of intense chemotherapy treatment and a liver resection/gallbladder removal surgery. Her treatment and surgeries were performed at Duke Children's Hospital in Durham, N.C.

Lindsey is currently considered NED (no evidence of disease). Even with successful treatment the chances of recurrence remain very high. Her chances of survival are 30%.

Since her diagnosis the prayer for Lindsey has been that God would grant her one miracle at a time until He delivers her from this cancer. Help us to extend Lindsey's miracles to other children and families in our area.

Please join us as we raise money to donate to the Make-A-Wish Foundation to help local children and their families. With your help we can extend "Little Miracles" to others facing similar life challenges.

100% of the funds raised through our event is kept within our community and used for local children!!!

5K and 1 mile Fun Run
Registration
Online At

www.LindseysLittleMiracles.org
